

Waterproof outdoor distribution box with charging function

AI Overview

A waterproof outdoor distribution box with charging function is an IP65-rated enclosure designed to protect electrical components from water, dust, and UV exposure while providing integrated charging capabilities for devices or equipment.

Key Features

Waterproof and Durable Construction: These boxes are typically rated IP65 or IP66, ensuring protection against rain, dust, and harsh outdoor conditions. Materials include ABS resin, polycarbonate, fiberglass, or corrosion-resistant metals like galvanized steel or aluminum alloy, providing impact resistance and UV stability for long-term outdoor use.

Charging Functionality: Some models integrate charging ports or stations for devices, making them suitable for outdoor events, construction sites, or solar-powered setups. Breakout holes and modular internal layouts allow flexible wiring and installation of DIN rail-mounted chargers, circuit breakers, or USB/AC outlets.

Versatile Applications: These boxes are used in gardens, rooftops, ship electrics, agricultural machinery, construction sites, and industrial facilities. They can house circuit breakers, switches, meters, and wiring connections, ensuring safe and efficient power distribution while supporting device charging.

Design and Safety Features: Modern enclosures include lockable access panels, clear labeling, ground fault protection, and ventilation systems to manage internal temperature. Proven gaskets and latch designs maintain waterproofing even after repeated openings.

Customization Options: Many manufacturers offer custom sizes, pre-assembled kits, and modular configurations to meet specific project requirements. Options include compact AT series for tight spaces or HT series for larger internal layouts with extra terminals and DIN rail support.

Environmental Suitability: These boxes operate in a wide temperature range (-25°C to $+85^{\circ}\text{C}$) a...
