

What is the price of a suspended fiber optic cable line

Overview

Median costs in 2025 were \$18 per foot for underground builds and \$8 per foot for aerial builds, with significant variation based on terrain, density, and construction methods, according to the Fiber Broadband Association. Armored fiber optic cables designed for direct burial cost \$6-14 per linear foot. Conduit systems add \$2-4 per foot but allow future cable additions. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Here is the 2026 benchmark for cost of laying fiber optic cable per foot by method: Open trench (lawn/field): \$0. Directional boring (road crossing, driveway): \$3. Main cost drivers include cable grade (indoor vs outdoor, armored), distance, and labor for trenching, splicing, and termination.
