

What level does the South Asia secondary distribution box refer to

Overview

- The secondary distribution box is located after the primary distribution box and distributes the power to each sub-area or specific group of electrical equipment. In India, distribution is mainly divided into: This Single line diagram shows general layout of Distribution System. 4kV to the distribution cabinet (primary distribution cabinet), then the outgoing line is led to the distribution box (secondary distribution box) in each building, and finally the outgoing line is led to the distribution cabinet. Often several customers are supplied from one transformer through secondary distribution lines. Note: The three-level power. The secondary box adopts the design of inner and outer doors, the appearance is plastic sprayed, safe and beautiful, and the rainproof box top is suitable for field work.
