

What router should I use for a 200Mbps mobile fiber optic broadband connection

AI Overview

For a 200Mbps fiber optic connection, a Wi-Fi 6 or Wi-Fi 7 router with at least 1 Gbps throughput, dual-band or tri-band support, and multiple Ethernet ports is ideal. Key Considerations

Speed and Standards: Even though your connection is 200Mbps, choosing a router that supports Wi-Fi 6 (AX) or Wi-Fi 7 (RS700S, Archer BE550) ensures future-proofing and optimal performance across multiple devices. These routers can handle speeds well above 1Gbps, so your 200Mbps connection will be fully utilized without bottlenecks.

Coverage and Range: For a typical home, a dual-band router is sufficient, but if you have a larger space or multiple floors, a tri-band router or a mesh system (like eero Pro 6E) can eliminate dead zones and maintain stable connections.

Ethernet Ports: Look for routers with at least 4 gigabit LAN ports for wired devices. Some high-end models, like the NETGEAR RS700S, offer 10G LAN/WAN ports and LAN aggregation, which can combine ports for faster wired speeds.

Security and Features: Modern routers include built-in security suites, parental controls, QoS, and device prioritization. For example, the NETGEAR Nighthawk RS700S comes with a one-year NETGEAR Armor subscription for malware and identity protection.

Recommended Routers

NETGEAR Nighthawk Tri-Band Wi-Fi 7 Router (RS700S)

Speeds up to 1,900Mbps Tri-band Wi-Fi 7, excellent range 10G LAN/WAN ports, LAN aggregation Ideal for multiple devices, streaming, gaming, and future-proofing

TP-Link Archer AX1800 (AX21)

Wi-Fi 6 dual-band, total 1.8Gbps OFDMA and MU-MIMO for multiple devices Beamforming for extended coverage Affordable and reliable for home use

Asus RT-AX88U or AX50

Wi-Fi 6, strong coverage up to 5,500 sq. ft. Eight gigabit LAN ports, mesh-capable Gaming and streaming features, robust security

TP-Link Archer BE550 (Wi-Fi 7)

Tri-band Wi-Fi 7, 2.4GHz, 5GHz, 6GHz Five 2....
