

Where is the South Asian pigtail fiber production base located

Overview

Southern Asia has limited upstream production of optical fiber pigtails; most finished goods are imported, primarily from China (50-55 % of regional supply by volume), with additional volumes from Japan, South Korea, and Taiwan. The Southern Asia optical fiber pigtails market is expected to expand at a compound annual rate of roughly 6-8 % between 2026 and 2035, driven by broadband penetration programmes, data-centre construction, and industrial automation upgrades across the region.
