

Zambian Two-Fiber Two-Electrical Switch Equipment

AI Overview

Industrial Ethernet switches in Zambia with two fiber and two electrical ports provide rugged, plug-and-play networking solutions for harsh environments. Overview These switches are designed for industrial and commercial networking applications, combining fiber optic ports for long-distance, high-speed connectivity with electrical (copper) ports for standard Ethernet connections. They are suitable for sectors such as mining, telecommunications, government, and enterprise networks in Zambia. Key Features Port Configuration: Typically, these switches feature 2 Gigabit electrical ports (1000Base-T) and 2 Gigabit fiber ports (1000Base-X), often SFP-enabled for flexible optical module installation. Rugged Design: Industrial-grade enclosures with IP40 rating, rail-mountable design, and wide operating temperature range (-40°C to 80°C) make them suitable for harsh environments. Power Supply: DC input options ranging from 12–52 V, with built-in overcurrent protection (4.0A), ensuring reliable operation in industrial settings. Certifications: Compliance with CE, FCC, RoHS, ISO 9001:2008, and local regulatory approvals such as the Public Security Ministry Inspection Report and MIIT Network Access License. Indicators and Management: LED indicators for port status and plug-and-play operation simplify installation and monitoring. Applications Telecommunications: Connecting fiber backbones to local Ethernet networks in urban and rural deployments. Industrial Automation: Networking control systems, sensors, and IoT devices in mining, manufacturing, and energy sectors. Enterprise Networks: Providing reliable connectivity for offices, data centers, and smart city infrastructure. Suppliers in Zambia LTS Group: Offers a wide range of fiber optic and electrical networking equipment, including switches, patch panels, and testing kits. Cable Network Solutions (CNS): Provides industrial-grade switches, fiber...
